

LADDERS AS A LAST RESORT

ASSESSMENT and JUSTIFICATION

NOTE: This assessment is to be used when workers are performing work from a portable ladder. This assessment/justification, must be affixed to the ladder during performance of the work. Where a fall exposure of 6 feet or greater exists while using a ladder, and a scaffold or MEWP is not feasible or creates a greater hazard, 100% fall protection is required.

Project & Job Location: _____

Issue Date: _____

Work Description: _____

PORTABLE LADDER USE JUSTIFICATION

Is the use of a scaffold feasible? ☐ Yes ☐ No Is the use of an MEWP (Aerial/Scissor Lift) feasible? ☐ Yes ☐ No

If the answers to either of the questions above are yes, then a ladder is not to be used. If the answers to the questions above are No, then describe the reason a portable ladder is necessary:

Choose the type of ladder based on feasibility with the Platform Ladder typically being the safest choice;

☐ Platform Ladder (1st Choice), ☐ Podium Ladder (2nd Choice), ☐ Extension Ladder (3rd Choice/for access only)

Explain why - if you can't use a platform or podium ladder: _____

Did the ladder pass inspection? ☐ Yes ☐ No

(If No, remove ladder from site and choose another ladder).

SELECT THE CONTROLS TO BE USED TO REDUCE THE FALL HAZARD

Check One or More

- ☐ Safety Monitor Assigned* (If Needed)
- ☐ Short Duration Task (<15 min.) (Mandatory) (Exceptions Must Be Approved by Jacobs CM and Project Safety)
- ☐ 3-Point Contact Maintained during performance of task
- ☐ Ladder Secured to a Fixed Object
- ☐ Light Duty Task (material being handled weighs <5 lbs.)
- ☐ Special Instructions (Describe)
- ☐ Selection of Special Work Methods (Describe)

*The role of a Safety Monitor will be to stabilize the ladder during use, and communicate verbal warnings to the ladder user of recognized fall hazard conditions

APPROVALS

Prepared By: _____
(Title) _____ Print & Sign _____ Date _____

Approved By: _____
(Field Work Supervisor) _____ Print & Sign _____ Date _____

Approved By: _____
