

Potentially Energized and Energized Electrical Safety Permit/Checklist

Work Location and Description (diagnostic or repair): _____

	Yes	No
Are proper energized work permits issued?		
Has an electrical work order been obtained?		
Are insulated tools required?		
Are insulating rubber blankets/mats required for this work		
Is the work to be performed on energized cables or equipment justified?		
Lockout/Tagout procedures are properly implemented?		
Has the completed SSOW & Permit been reviewed and approved by the Electrical Superintendent & HSE Manager?		
Have all personnel involved in the task completed a risk reduction assessment and a Task Safety Awareness (TSA) meeting/review?		
Has the approach boundary been identified, and mitigation measures established?		
Have all Qualified and Non-Qualified personnel been properly trained in accordance with working on or near energized or potentially energized circuits or equipment?		
Is there adequate lighting for the work to be performed?		
Are stand-by personnel available? (Stick man / first aid attendant)		
Are barricades and/or signage in place to identify boundaries?		
Has the potential incident energy been determined?		
Are QEW's trained and have the appropriate PPE level for the hazard?		
Does the work team know what to do & who to notify if the circuit is tripped?		
Contact Name: _____ Ph.#: _____		
Contact Name: _____ Ph.#: _____		

All "No" answers must be explained:

Prior to conducting work on any energized equipment, approval must be obtained from the Construction Manager, the Electrical Superintendent, and HSE manager. The Company Maintenance or Construction Manager is required for **Repair** work on or above 480v. This is to certify that I have reviewed the electrical work as described above and authorize this work to be performed in an energized state. I further certify that all required safety precautions have been taken to safeguard the employees involved.

Supervisor Signature

Permit for Energized Electrical Work

PART I: TO BE COMPLETED BY THE REQUESTER

Job/Work Order Number: _____

(1) Description of circuit/equipment/job location: _____

(2) Description of work to be done: _____

(3) Justification of why the circuit/equipment cannot be de-energized or the work deferred until the next scheduled outage: _____

Requester/Title: _____

Date: _____

PART II: TO BE COMPLETED BY THE ELECTRICALLY QUALIFIED PERSONS DOING THE WORK

Enter details for each step and place check in each box when completed.

☐ Detailed job description procedure to be used in performing the above detailed work: _____

☐ Description of the safe work practices to be employed: _____

☐ Results of the shock hazard analysis: _____

☐ Determination of shock protection boundaries: _____

☐ Results of the flash hazard analysis: _____

☐ Determination of the flash protection boundary: _____

☐ Necessary personal protective equipment to safely perform the assigned task: _____

☐ Means employed to restrict the access of unqualified persons from the work area: _____

☐ Evidence of completion of a job briefing (SSOW), including discussion of any job-related hazards: _____

☐ Standby person provided, who has emergency rescue and response training, energized electrical training PPE, and communication equipment and capabilities: _____

☐ Are actions and necessary notifications established in the event a circuit is tripped or incident occurs? _____

☐ Do you agree that the work described above can be done safely? ☐ Yes ☐ No (If no, return form to requester.)

Qualified Electrician: _____ Date: _____

Qualified Electrician: _____ Date: _____

PART III: APPROVAL(S) TO PERFORM THE WORK WHILE ELECTRICALLY ENERGIZED:

Prior to conducting work on any energized equipment, approval must be obtained from the Site/Project Manager the Electrical Superintendent, and HSE manager. The Company Maintenance or Construction Manager is required for **Repair** work on or above 480v. This is to certify that we have reviewed the electrical work as described above and authorize this work to be performed in an energized state. We further certify that all required safety precautions have been taken to safeguard the employees involved.

Contractor Electrical Superintendent

Jacobs Electrical Superintendent

Contractor HSE Manager

Jacobs CM

Once the work is complete, forward this form to site HSE for review and retention.

Electrical Safety	Document No: HS-HS-WI-0344-PC-F-01	Jacobs
Electrical Safety Permit	Project No: 29-MAR-2021	Page: 1 of 2 Rev 0

Date of Validity (DD/MM/YYYY)		Permit No.	
----------------------------------	--	------------	--

1. Personal Details: (to be completed by person performing the task)			
Name		Additional Persons*	1
Company			5
Contact No			5

**If additional names required list separately and attach to*

permit

2. Permit Type (please tick box etc.)	3. Electrical Work Description
☐ Electrical Work Permit	
☐ Electrical Access Permit	
☐ Isolation/Energisation Request	
Reasons for Access:	

4. Nature of Work
Equipment/System ID:
Location of Work:

5. Additional Information		
SSoW/RA Required	Yes	No
Proof of Disconnection	Yes	No
Permission for Test	Yes	No

6. Equipment and Safety Precautions: Putting equipment into safe mode								
	Yes	No	N/A		Yes	No	N/A	
All electrical power sources identified				Other hazardous energies/sources identified				
Sources isolated (Note 1)				Hazards isolated/controlled				
Specify isolation location(s):	Specify how isolated:							

Note 1 – Compelling reason required if isolation is not possible (give details below)

7. Safety Preparedness Checklist: (to be completed by person performing the task)								
	Yes	No	N/A		Yes	No	N/A	
ARC Flash type suit Cal rating:				Electrical Safety – Shepherds hook				
Insulated tools				Person trained and authorized				
Warning signs				Familiar with emergency procedure				
Electrically rated safety gloves				Fire extinguisher CO ₂ or Halon				
Rubber mat				Safety Observer				
Lockout/tagout equipment				Other permits required				
Protective barriers				Full face visor				

If either qualified person to whom permit is issued or buddy (where applicable) leave the location all work must cease

8. Qualified Person & Buddy Signatures	Signature	Date	Time
Authorized Person	Print Name	/ /	:
I certify that I am qualified to carry out the work described above, and that I understand and will follow	Signature		

the electrical policy and all safety procedures necessary to complete the job safely.			
Buddy (where applicable) I confirm that my duties as safety observer will be adhered to.	Print Name Signature	/ /	:
9. Permit Approval			
Authorizing Person Work can commence providing the conditions of the above section are met.	Print Name Signature	/ /	:
Client Approval (If required) Work can commence providing the conditions of the above section are met.	Print Name Signature	/ /	:
10. Permit Closure			
Qualified Person (person in charge of work) I confirm that the work for which this permit was issued is Complete [] Incomplete [] and the are/equipment is in safe condition. All debris and foreign material has been removed from the work area. All persons under mu control have been withdrawn and have been made aware they are no longer approved to work on the equipment.	Print Name Signature	/ /	:
Authorizing Person This permit is now closed/cancelled and no longer valid.	Print Name Signature	/ /	:
Note 1 – Compelling reason required if isolation is not possible (give details below):
